

DS-1002HMI-S Mobile DVR Backup Device

Key Features

DS-1002HMI-S backup device is designed to back-up the recorded video data from DS-8000HMI/HMFI mobile DVR. High-speed back-up, settings and other auxiliary operations are also available. It is an optional device for Hikvision DS-8000HMI/HMFI series mobile DVR.

The backup device DS-1002HMI-S can be connected to mobile DVR with e-SATA interface and backup recorded video data in any specified time frame. Mobile DVR video output also can be connected to DS-1002HMI-S video input in order to use DS-1002HMI-S LCD to display mobile DVR menu.

After the back-up, DS-1002HMI-S can be connected to PC via USB, SATA or 1394 interface to playback the video data.
